

## What to Expect For Your **Home Addition**

Instead of waiting to find the perfect house for your family's needs, why not make your current home your dream home? Building a custom home addition is one of the best ways to add functionality and more value to your home. More space, bigger rooms, or a primary suite are just a few of the upgrades we specialize in. If you want to add to your home but you're not sure what the best plan is, our team is here to advise you.

# Home Addition What to Expect

---

## Strategize

What functionality are you hoping the addition will provide? We like to call this thoughtful design. Think through your goals so that we can make sure the new design achieves exactly what you want.

## Pair Your Projects

Are there other projects in your home that it makes sense to tackle while construction is taking place? Is there a wall you've been wanting to knock down, or an area that's overdue for updated flooring? Checking off an extra project while we build your addition will minimize the time that your home is in temporary disarray.

## Blueprints

If you can dig out the old blueprints or drawings from your home, our team will be able to determine the best plan to add on to your existing space. Don't worry if you don't have access to the original plans. We will make a rough sketch of your floor plan before we dive into designing.
